Confirmed Cases
in India

Recovered

Deaths

Unemployment

During the lockdown, an estimated 14 crore (140 million) people lost employment and many others took pay cuts. More than 45% households across the nation have reported an income drop as compared to the previous year.

Impact on health

The Covid-19 pandemic has affected people physically and mentally. Many people stopped visiting hospitals, with the fear of getting infected by the virus. COVID-19 is affecting people's social connectedness, their trust in society and institutions, as well as jobs and incomes. It has also taken a huge toll by causing widespread anxiety and worry. Shortage of medical supplies has impacted people with various conditions.

Donate to and support those suffering during this Pandemic
