## A little goes a long way, Donate Now

**\$500,000 needed**

There are many ways you can help at this critical time:

**\$25 (Support 5,000 families)**

Support a family of 4 for 30 days.

**\$30 (Support 4,000 families)**

Gives a medical kit to help save lives.

(Oxymeter, Thermometer, Gloves, Medicine, Masks etc.)

**\$100 (Support 3,000 imams/teachers)**

Supports a teacher/imam's family for one month with emergency needs as their masajid/schools are shutdown.

**\$500 (Support with 500 machines)**

Lend a patient an oxygen machine to use at home.

## Donate for Covid Relief Today

Help a Covid patient breathe easily and recover at home.

Sponsor a machine today

# OXYGEN CONCENTRATORS

Bringing affordable solutions to the people who need it most

Oxygen concentrators are a good alternative to oxygen cylinders because they are easy to operate, portable and do not require any license to stock, transport or lease.

**\$500 IS ALL IT TAKES TO HELP SOMEONE BREATHE EASILY AGAIN**

Covid19 suspects and positive patients develop accurate respiratory syndrome and breathing issues that require oxygen support. This has impacted the supply of oxygen cylinders to people who need it most.

Oxygen concentrators are widely used as an alternative and easy to own. It takes regular air and purifies it to 90-95% oxygen. To do this, the concentrator uses a compressor that moves air into sieve bed filters to remove the nitrogen. It then distributes the purified oxygen through hoses inserted into the nostrils. The nitrogen is later released back into the air.

24X7 Medical Oxygen at Home....Made Easy

ULTRA PORTABLE

MEDICALLY APPROVED

Instantly Increases Oxygen Levels

RECOVERY
